METHOD AND APPARATUS FOR CONFIGURING AN INPUT/OUTPUT BUFFER
FOR AN INTEGRATED BUS BRIDGE AND GRAPHICS CONTROLLER

Abstract Of The Invention

5 A configurable bus interface circuit includes an internal bus bridge. The configurable bus interface circuit also includes an internal I/O circuit operably couplable to an external circuit, and operably coupled to the internal bus bridge. The configurable bus interface circuit also includes an internal circuit operably coupled to avoid signals from the internal I/O circuit and operably coupled to the internal bus bridge.
